

Now Serving: 9 Billion

Global Dialogue on Meeting Food Needs for the Next Generation

How will we feed 9 billion people in 2050?

Will there be enough water for a thirsty world?

How can we improve the livelihood of our world's 2.5 billion farmers?

For decades, Nobel Peace Prize Laureate Norman Borlaug worked tirelessly to answer these questions and provide resource-poor farmers with the tools needed to improve farming techniques and feed billions.

How can we continue his legacy and ensure food security for a growing world population?

Join leading agricultural experts in an international, "Town Hall 2.0" discussion on how to address challenges farmers and nations will face in the next century. Panelists will comment on Dr. Borlaug's last published statement – featured in a new Council for Agricultural Science and Technology (CAST) report.

Join the discussion and make **your** voice heard on how agricultural policies can make a difference for the future.
Participate in-person or online via Webcast, Twitter, Facebook, and e-mail.

The challenges are daunting. We need solutions now. We need your support.

- What:** *Now Serving: 9 Billion: Global Dialogue on Meeting Food Needs for the Next Generation*
- When:** **Friday, Feb. 12, 2010** 10:00 a.m. – 12:00 noon EST
- Where:** The Newseum, Knight Broadcast Studio, 555 Pennsylvania Avenue, NW, Washington, D.C.
Live-streamed *via* Webcast at www.CropNewsNetwork.com
- Who:** Moderated by: **Frank Sesno**, George Washington University
- Register:** Please register online for free at: <http://newseumcast.eventbrite.com/>
