District of Columbia’s bioscience industry is a strategic and growing technology component of the overall U.S. economy. American bioscience innovation in health, energy, and agriculture supports state & local communities in a variety of ways ranging from job creation, construction, tax revenues, and other economic impact values. Driven by small-company innovators, this valued industry is also mobilizing in an unprecedented manner to address the global COVID-19 pandemic, and other life-saving and life-enhancing products and services for the U.S. and elsewhere. America’s bioscience industry has never been more important, both for our health and our economic recovery.
