

EXCLUSIVE COST SAVINGS FOR BIO MEMBERS

[LEARN MORE](#)

Do you have idle equipment taking up space in the lab? Is your surplus strategy aligned with environmentally sustainable practices?

Laboratories have the potential to make a significant impact by adopting a surplus strategy for equipment that is unused, designated to be replaced, or discarded. Instead of letting this equipment go to waste, you can work with **American Laboratory Trading** to sell off idle instruments.

A surplus strategy will give your organization access to working capital, allows researchers more time on science, ensures your commitment to sustainability and green initiatives, and provides access to quality equipment to the life science community. It's a win-win for everyone.

Consider ALT the next time you upgrade equipment, relocate, or liquidate a facility.
