NEW STUDY WARNS**

MEAT IS MADNESS

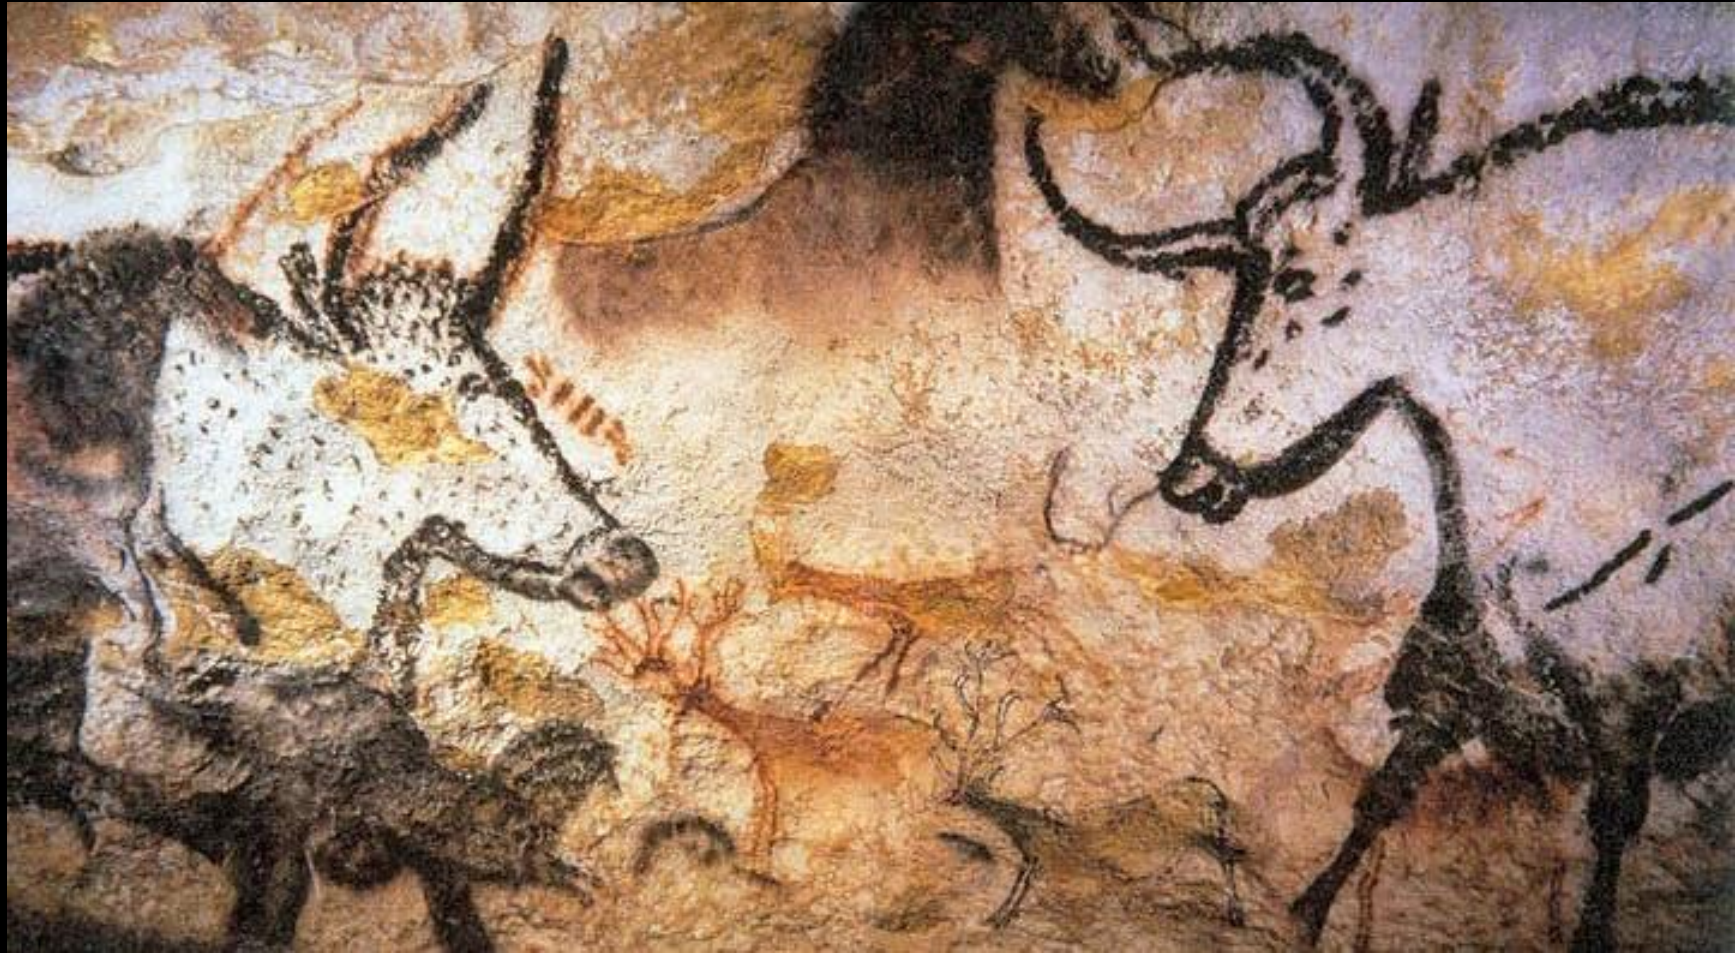

Why it leads
to global
warming
and obesity

Apocalypse Pig

The last Antibiotic Begins to Fail

Grazing systems

DID YOU KNOW?

Provides livelihoods for ca. **100 million people** living in harsh climates

✓ Benefits, if well managed:

Food security, social & ecological benefits

- **Needs:** Access to markets, services and related infrastructure, and, in pastoral systems, improved herd mobility, community engagement in sustainable management of natural resources and disaster risk management.

Mixed crop-and-livestock systems

DID YOU KNOW?

Uses **2.5 billion hectares** of land; produces **60% of beef** and **90% of milk**

✓ Benefits, if well managed:

Poverty alleviation, resilience & synergy

- **Needs:** Improved access to inputs, services, efficiency and sustainability of natural resources management, collective actions and gender.

Industrial systems

DID YOU KNOW?

Produces over **60% of pork** and **85% of chicken meat**

✓ Benefits, if well managed:

Food affordability, productivity & efficiency

- **Needs:** Regulatory framework and market-based incentives for animal welfare, public health and environmental sustainability.
